- Width In.: 6
- Depth Ft.: 60
- Depth In.: 2

### Description

## Plan Description

This is one of the newest plans by award winning designer Michael E. Nelson. This farmhouse style house plan is sure to please with just over 2,000 square feet of living space, 3 bedrooms, 2 full baths and 2 half baths. The exterior of this home design combines the traditional farmhouse look with rustic stylings to generate massive curb appeal. On the inside of the home, you will find a split layout that goes against the traditional farmhouse style house plan and incorporates the more modern element of an open floor plan. Be sure to check out the massive walk-in closet in the master suite and the huge pantry just off the kitchen!

## Curb Appeal

You can't have a farmhouse without a covered front porch and this house plan delivers with a lovely covered porch with exposed timber beams to give it a rustic feel. The porch also has a lovely vaulted ceiling that make sure you and yours are going to stay dry coming into the home.

## **Uniquely Traditional Space**

Entering the home, you find yourself in the foyer. This unique space is a traditional foyer in every sense except for the bank of windows on the wall on the left side. This bank of windows gives you a great view, but it also lets in tons of light in what is traditionally a dark and gloomy area of the home.

## **Room to Grow**

To the right of the foyer is a bedroom that can be used as a guest room or study. This room is accessed through barn doors from the foyer and features a double window that looks out under the covered porch in the front of the home.

Bedroom 3 also gives you a large walk-in closet and access to a shared bathroom through a sliding or pocket door. The walk-in closet is so large that it has to have its own window! This shared bathroom is on the interior of the home and can be used in case of severe weather as a safe spot.

Moving through the shared bathroom, you find yourself in the second bedroom. This large room has plenty of space for kids to grow into and has two windows that face the side of the home.

Bedroom 2 also has a large walk-in closet. This space can be accessed either through the shared bathroom or from a short hallway between the great room and the bedroom.

## **Dynamic Outdoor Living**

This hallway also has one of the two half baths making it a convenient guest bathroom. You can also access the outdoor living area from this small hallway. The outdoor living area is located on the rear of the home.

This large outdoor space is perfect for entertaining in all kinds of weather. It's split into two

sections. The larger section, which is closer to the great room, has a vaulted ceiling and is perfect for grilling. The smaller section is still covered and has a large fireplace along one side of it that would be great for snuggling up close to on a chilly day.

## **Open Floor Plan**

The central core of this home design is the open floor plan. This open floor plan incorporates the great room, kitchen and dining area into one seamless space. The great room features a vaulted ceiling which continues the trend from the front porch.

The great room also gives you two sliding doors that open up to the grilling porch on the rear of the home where that vaulted ceiling is brought to the great outdoors. The great room has exposed faux beams and a large fireplace to give you that rustic vibe in the space. The other side of the great room gives you a bank of windows that looks out into the front of the home. This section of the landscaping would be a great place for a bird feeder or a butterfly garden.

## **Drop Worthy Kitchen**

The kitchen and the great room are separated by a very long kitchen island that spans nearly the width of the room. This island has seating for 6 and gives you a perfect place to prep dishes and to clean up after a meal with the large sink and dishwasher. This lets you keep an eye on the comings and goings while you are cleaning up.

The rest of the kitchen has loads of counterspace and room for a large range that is centrally located in the left wall of the space. Don't forget about the large pantry! This pantry is perfect for those who don't like to go to the store very much or who want to buy in bulk.

## **Entertaining in Style**

Adjacent to the kitchen is the dining room. This large space gives you tons of room for entertaining. I think you could probably fit a 10-seat table easily into this space. The dining room also features a bank of windows that look out onto the rear of the home.

## **Fabulously Organized with a Mudroom**

If you are entering this plan from the garage, you will find yourself in a long hallway. This hall gives you access to the second floor and its bonus room with the vaulted ceiling. You will also find a space with a bench with hanging storage that would be perfect for a mudroom.

## **Life's Little Messes**

Just before you reach the master suite, you will find the large laundry room. This laundry area is perfect for those busy families. The laundry room has space for both a counter and sink as well as storage over the washer and dryer to hang clothing or to air dry them.

## **Massive Master Suite**

The master suite is in the rear of the home and has plenty to offer. The master bedroom features a boxed ceiling that lends elegance and space to the room. Speaking of space, nothing makes a room feel more spacious than windows and this master bedroom definitely delivers with a triple window that looks out onto the rear of the home.

The master bath gives you everything you would need to relax after a hard day of work. It features a double vanity, a free-standing tub and a corner glass shower. Don't forget about the large walk-in closet! Not only does it give you plenty of space, but putting clothes away is a breeze because of the connecting door to the laundry room.

## **Customizing This House Plan**

**Making this house plan onto your dream home!**

We understand that when it comes to building a home you want it to be perfect for you. Our team of experienced house plan specialists would love to be able to help you through the process of modifying this, or any of the other house plans found on our website, to better fit your needs.

Whether you know the exact changes you need made or just have some ideas that would like to discuss with our team send us an email at: [info@nelsondesigngroup.com](mailto:info@nelsondesigngroup.com) or give us a call at 870-931-5777 What to know a little more about the process of customizing one of our house plans?
