Description

NDG 528

Cedar shake and a cozy porch with round columns welcome you into Windstone Place, a split bedroom home plan elegant enough for the elite and conservative at the same time. Once inside the foyer, a ten-foot ceiling continues through to the great room with fireplace for a grand effect. To the right, a formal dining room features a columned entry and sits below a stunning eleven-foot boxed ceiling. Opening to the kitchen, you will find the perfect amount of counterspace and open bar seating. The breakfast room is the perfect addition to the kitchen, sharing the gorgeous ten-foot ceiling, and enjoys an outside view looking through a cozy bay window to the large covered grilling porch.

Split Bedroom Floor Plan

An elegant master suite to the right of Windstone Place also features private access to the grilling porch. Through stylish French doors, step inside the luxury Master Bath to take a soak in the whirlpool tub or refresh yourself in the glass walk-in shower. A dual sink vanity offers extra counter space for getting ready in the morning, and the spacious walk-in closet provides ample storage not only for your wardrobe favorites but also for extra linens! Just outside, a large laundry room and half bathroom lead to a courtyard entry garage, and a staircase leads to a spacious bonus room if desired.

The left side of Windstone Place holds the rest of the bedrooms, giving you the privacy you need. Bedroom 2 may also be used as a study and includes a modest step-in closet, as well as optional built-ins. Bedroom 4 is the biggest bedroom, perfect for the teenager in your home, and a full bathroom with a dual sink vanity between bedrooms 3 and 4 will keep those morning rushes free of pesky sibling fights!
