Description

This beautiful Michael E. Nelson design has great curb appeal with its high roof line, stone siding and elegant windows. As you step into the foyer you can head to the Study on your left, the Dining Room on your right or straight into the spacious Great Room. This Great Room displays a beautiful vaulted ceiling with exposed timber beams and a cozy fireplace perfect for a cozy night spent at home. This room flows into the Kitchen allowing for the perfect space to entertain friends and family. The Kitchen features a double island design giving you plenty of counter space, as well as a walk through pantry and a connected breakfast room for informal dining. You'll also notice a half bath near the Kitchen that can be used as a pool bath as well. Tucked away privately in the right side of the home is the huge Master Suite where you can enjoy a fireplace or the private screened porch, and you can't forget about the Master Bath. This bath is complete with large dual sink vanity, knee space for a perfect "makeup station", a private toilet room, spacious steam

shower and to top it off, a free standing tub located in the center of the room. You'll also notice the master closet that has direct access to the laundry room. On the other side of the home are Bedrooms 2 and 3 each with their own walk-in closet and private bathroom. Love spending time outside? You'll now have the perfect place to do this with the spacious Grilling porch that features a fireplace and outdoor grilling kitchen.
